

The Price Of Three Cases Of Water Gives Pure Water for 10 Years To A Family in Haiti

\$20

Haiti has been devastated by Hurricane Matthew. It is estimated that over 750,000 people have had their homes damaged or totally destroyed. Medical teams are already seeing cases of **Cholera** and people have already died since October 5th when the storm hit the southern peninsula. Pure drinking water is the most urgent need right now. Here's what \$20 will do:

- Provide a water filter to Haiti designed to last 10 years
- This filter does not require any additional parts
- It eliminates all the nasties that will make people sick
- Filters up to 170 gallons of water a day
- The assistance will be coordinated by organizations already serving the people of Haiti
- 100% of your donation will be used to help this emergency
- The organization is an IRS recognized non-profit

The water filters use Hollow Fiber Membranes, a technology developed for kidney dialysis. The filters are comprised of tiny “U” shaped micro tubes that allow water to enter into their cores through the tiny micro pores.

New Hope Coalition began in 2012 when God instilled a vision into Pastor Odman Charles to serve the Haitian community in a “NEW” way. He focuses on a servant-leader model that seeks to develop mature disciples while ministering to the practical needs of people in the community. Two communities in the U.S. and four in Haiti are encouraged by this.

All harmful bacteria, including those which cause Cholera, Typhoid, E Coli, protozoa, and cysts are filtered out of the water, all the nasties! It removes anything in the water larger than 0.1 microns... that is **SUPER** small !!!

According to [USA Today](#), “More people die each year from unsafe water than from all forms of violence, including war.”

Our Goal is 175,000 Filters to Haiti
